10.1. YOU FURTHER ACKNOWLEDGE AND AGREE THAT THERE ARE RISKS ASSOCIATED WITH PURCHASING, OWNING AND USING TOKEN(S) YOU ARE AWARE THAT YOU MAY LOSE ALL AMOUNTS AND FEES PAID TO THE COMPANY DURING THE PURCHASING OF TOKEN(S) TOKEN(S)MAY HAVE NO VALUE AFTER PURCHASE. THE PURCHASE PRICE AND VALUE OF TOKEN(S)MAY FLUCTUATE AT ANY TIME FOR ANY REASON. BY PURCHASING TOKEN(S) YOU EXPRESSLY ACKNOWLEDGE AND ASSUME THESE RISKS AND THE FOLLOWING RISKS, AS WELL AS ALL OTHER RISKS ASSOCIATED WITH TOKEN(S)(INCLUDING THOSE NOT DISCUSSED HEREIN), ALL OF WHICH COULD RENDER TOKEN(S)WORTHLESS OR OF LITTLE VALUE:

- (a) Purchasing Token(s) is at your sole risk and that Token(s) are each provided, used and acquired on an "AS IS" and on an "AS AVAILABLE" basis without representations, warranties, promises or guarantees whatsoever of any kind by the Company. You must rely on your own examination and investigation thereof.
- (b) Token(s) have no rights, uses, purpose, attributes, functionalities or features, express or implied outside of Coinware.
- (c) Token(s) may not be usable on Coinware and do not entitle you to anything with respect to Coinware.
- (d) There are no guarantees as to the price of Token(s) purchased by you and no guarantees that the price per Token(s) determined by the market will be equal to or higher. There is the possibility that the price per Token(s) may fall below the price paid by initial buyers of Token(s) during the initial distribution period. The Company reserves the right to change the duration of any timeframe for the distribution of the Token(s) including, without limitation the unavailability or non-functionality of the Website or other unforeseen procedural or security issues.
- (e) Transactions may not be recorded in the last-closed ledger until the transaction has been ratified through the Coinware consensus algorithm. Timing of ratification may occur at random times. For example, Token(s) transfers in a given open ledger may not be included in the next last-closed ledger, and may be included in the candidate set for the beginning of the consensus process on the next open ledger. As a result, the last-closed ledger may not include your transaction at the time you expect and you may not receive Token(s) on the same day you purchase the Token(s).
- (f) Transactions on the Coinware Consensus Ledger may be delayed or lost due to operational error or malicious attacks by third parties. You acknowledge and understand that the last-closed ledger may not include your transaction when you want or expect and that your transaction may be excluded or discarded entirely.
- (g) You may never receive Token(s) and may lose the entire amount you paid to the Company for such Token(s) as a result of interruptions and operational errors in the process of purchasing or receiving the Token(s).

- (h) You may be unable to sell or otherwise transact in Token(s) at any time, or for the price you paid due to (a) diminution in value of the Token(s); (b) lack of liquidity for the Tokens; or (c) the Company imposing restrictions on the transferability of the Token(s).
- (i) Token(s) may be subject to expropriation and/or theft. Hackers or other malicious groups or organizations may attempt to interfere with the Token(s) in a variety of ways, including, but not limited to, malware attacks, denial of service attacks, consensus-based attacks, Sybil attacks, smurfing and spoofing. Furthermore, because Coinware rests on open source software and Token(s) are based on open source software, there is the risk that Coinware may contain intentional or unintentional bugs or weaknesses which may negatively affect Token(s) or result in the loss of your Token(s) the loss of your ability to access or control your Token(s) or the loss of any other assets in your account. In the event of such a software bug or weakness, there may be no remedy and holders of Token(s) are not guaranteed any remedy, refund or compensation.
- (j) Token(s) purchased by you may be held by you in a digital wallet or vault, which requires a private key, or a combination of private keys, for access. Accordingly, loss of requisite private key(s) associated with your digital wallet or vault storing Token(s) may result in loss of such Token(s) access to your Token(s) balance or any balances in blockchains created by third parties. Moreover, any third party that gains access to such private key(s), including by gaining access to login credentials of a hosted wallet or vault service you use, may be able to misappropriate your Token(s). The Company is not responsible for any such losses.
- (k) Coinware and all of the matters set forth in the Whitepaper are new and untested. Coinware might not be capable of completion, implementation or adoption. Even if the project is completed, implemented and adopted, it might not function as intended, and any Token(s) associated with a blockchain adopting the project may not have functionality that is desirable or valuable. Also, technology is changing rapidly, so the Token(s) and the Project may become outdated.
- (l) Even if completed, the Coinware project may rely, in whole or partly, on third parties to adopt and implement it and to continue to develop, supply, and otherwise support it. There is no assurance or guarantee that those third parties will complete their work, properly carry out their obligations, or otherwise meet anyone's needs, all of which might have a material adverse effect on the Coinware project.
- (m) Your failure to map a public key to your account may result in third parties being unable to recognize your Token(s) balance on the Coinware Consensus Ledger.
- (n) If you choose to maintain or hold Token(s) through a third party, your Token(s) may be lost or stolen. You hold Token(s) through a third party at your own sole risk.
- (o) The Coinware project is still under development and may undergo significant changes over time. The Company has the right, in its sole discretion, to change and modify the White Paper for any reason at any time without notice to you.
- (p) The Coinware Project may never be completed, the Project may not be completed initially proposed proposed by the Company, and in a different or modified form; a blockchain utilizing or adopting features of the Project may never be launched; and a blockchain may never be launched with or without changes to the project.
- (q) The development of the Project may be abandoned for a number of reasons, including, but not limited to, lack of interest from the public, lack of funding, lack of commercial success or prospects, or departure of key personnel.
- (r) Even if the Project is finished, launched and adopted, the ongoing success of the Project relies on the interest and participation of third parties. There can be no assurance or guarantee that there will be sufficient interest or participation in the Project.
- (s) The regulatory status of cryptographic tokens, digital assets and blockchain technology is unclear or unsettled in many jurisdictions. It is difficult to predict how or whether governmental authorities may regulate such technologies. It is likewise difficult to predict how or whether any governmental authority may make changes to existing laws, regulations or rules that may affect cryptographic tokens, digital assets, blockchain technology and its applications. Such changes could negatively impact Token(s) in various ways, including for example, through a determination that Token(s) are regulated financial instruments that require registration. The Company may cease the distribution of Token(s) the development of the Project or cease operations in a jurisdiction in the event that governmental actions make it unlawful or commercially undesirable to continue to do so.

- (t) The industry in which the Company operates is new, and may be subject to heightened oversight and scrutiny, including investigations or enforcement actions. There can be no assurance that governmental authorities will not examine the operations of the Company or pursue enforcement actions against the Company. Such governmental activities may or may not be the result of targeting the Company in particular. All of this may subject the Company to judgement, settlements, fines or penalties, or cause the Company to restructure its operations and activities or to cease offering certain products or services, all of which could harm the Company's reputation or lead to higher operational costs, which may in turn have a material adverse effect on the Token(s) of the development of the Project.
